

# Insurance and Self-pay care fee for Fertility treatment from April, 2022

movie : Insurance-Covered Treatment

## Example of treatment with insurance

### Timed Intercourse

General fertility treatment administrative fee ¥750  
Treatment, Test, Medication Around ¥4,800

**Total cost for 1 cycle is about ¥5,550**

### AIH/IUI

General fertility treatment administrative fee ¥750  
Treatment, Test, Medication Around ¥9,500  
Artificial insemination ¥5,460

**Total cost for 1 cycle is about ¥15,710**

### Examples of IVF using as few medications as possible

- Ovulation induction is Low stimulate method.
- After fertilization, the embryos are cultured for 5 days (blastocyst) and transferred as fresh embryo.

Assisted reproductive medical care administrative fee ¥900  
Treatment, Test, Medication Around ¥13,000  
Egg retrieval (One egg) ¥16,800  
Conventional IVF ¥12,600  
Cultivated to blastocyst ¥18,000  
Time lapse cultivated method \* ¥25,000  
Laser-assisted hatching\* ¥3,000  
Hyaluronic acid culture solution \* ¥3,000  
Fresh embryo transfer ¥22,500

\*Optional is by request only.

**Total cost is about ¥114,800**

If the first embryo transfer is unsuccessful, another egg retrieval will be performed, which will cost about the same amount for the second one.

### Example of IVF with emphasis on pregnancy rate per egg retrieval

- Use oral medication and injection to induce ovulation.
- After fertilization, the embryos are cultured for 5 days (blastocyst) and froze whole embryos.
- Freeze and thaw embryo transfer in the following cycle or later.

┌ Assisted reproductive medical care administrative fee ¥900  
Egg retrieval Cycle Treatment, Test, Medication Around ¥35,000  
Egg retrieval (10 eggs) ¥31,200  
Conventional IVF ¥12,600  
Cultivated to blastocyst ¥37,500  
Time lapse cultivated method \* ¥25,000  
└ Embryo freezing(5embryos) ¥21,000

┌ Assisted reproductive medical care administrative fee ¥900  
Embryo Transfer Cycle Treatment, Test, Medication Around ¥15,000  
Laser-assisted hatching\* ¥3,000  
Hyaluronic acid culture solution \* ¥3,000  
SEET method \* ¥20,000  
└ Frozen thawed embryo transfer ¥36,000

\*Optional is by request only.

**Total cost is about ¥241,100**

If the first embryo transfer is unsuccessful, only the "Embryo Transfer Cycle Fee" will be charged as long as there are remain embryos after the second embryo transfer.

Insurance treatment is available under the high-cost medical expense benefit. There is a system which refund is made for the amount by the total amount of insurance medical treatment for the month exceeds the "co-payment limit (based on personal income). Please check with your insurance association.

### Consultation fee

	Health insurance	Self-pay care
Initial fee	¥860	¥2,880
Re-visit fee	¥380	¥1,250

### Timed intercourse and AIH/IUI

	Health insurance	Self-pay care
General fertility treatment administrative fee	¥750	—
AIH/IUI	¥5,460	¥22,000
Test and medications for 1 cycle	¥3,000~¥10,000	¥16,000~¥30,000

### IVF

	Health insurance	Self-pay care
Assisted reproductive medical care administrative fee.	¥900	—
Ovulation induction	¥10,000~	¥16,000~
Ultrasound/Hormone level test	¥7,000~ per 1 cycle	¥17,000~ per 1 cycle

# IVF Egg retrieval to Embryo transfer

Egg retrieval

## Health insurance

Collected eggs : 0	¥9,600
Collected eggs : 1	¥16,800
Collected eggs : 2-5	¥20,400
Collected eggs : 6-9	¥26,100
Collected eggs : ≥10	¥31,200

## Self-pay care fee

Collected eggs : 0	¥49,500
Collected eggs : 1-2	¥140,250
Collected eggs : 3-5	¥176,000
Collected eggs : ≥6	¥202,400
From the third egg retrieval	¥-44,000

How to fertilized

ICSI is PIEZO-ICSI

Conventional IVF	¥12,600
ICSI : 1 egg	¥14,400
ICSI : 2-5eggs	¥20,400
ICSI : 6-9eggs	¥30,000
ICSI : ≥10eggs	¥38,400

Conventional IVF and ICSI :  
If both are performed, ICSI fee +6,300 yen

ICSI is PIEZO-ICSI

Conventional IVF	¥74,800
ICSI : ≤5 eggs	¥154,000
ICSI : ≥6 eggs	¥176,000
Split ICSI : ≤5eggs	¥187,000
Split ICSI : ≥6eggs	¥209,000
Rescue ICSI/ 1 egg	¥33,000

Cultivated

Early embryo(Cultivation up to day 3)

Fertilized egg : 1	¥13,500
Fertilized egg : 2-5	¥18,000
Fertilized egg : 6-9	¥25,200
Fertilized egg : ≥10	¥31,500

Blastocyst: Additional culture from day 4 to day 6.  
(Added to early embryo culture)

Fertilized egg : 1	¥4,500
Fertilized egg : 2-5	¥6,000
Fertilized egg : 6-9	¥7,500
Fertilized egg : ≥10	¥9,000

Early embryo (Up 3days) Fertilized eggs : 1-5	¥50,600
Early embryo (Up 3days) Fertilized eggs : ≥6	¥56,650
Blastocyst (Up to 6days) Fertilized eggs : ≤5. after 4 days of Cultivation : ≤5.	¥69,300
Blastocyst (Up to 6days) Fertilized eggs : ≥6. after 4 days of Cultivation : ≤5.	¥75,900
Blastocyst (Up to 6days) Fertilized eggs : ≥6. after 4 days of Cultivation : ≥6.	¥77,550

Embryo transfer

Fresh embryo transfer	¥22,500
Frozen thawed embryo transfer	¥36,000

Fresh embryo transfer	¥44,500
Frozen thawed embryo transfer	¥77,000

Embryo cryopreservation

1 embryo	¥15,000
2-5 embryos	¥21,000
6-9 embryos	¥30,600
≥10embryos	¥39,000

Cryopreservation renewal costs : ¥10,500/year

Per 1 embryo	¥27,500
--------------	---------

Cryopreservation renewal costs : ¥22,000/year

## Optional menu \*Advanced medical treatment

	Health insurance	Self-pay care fee
Time lapse cultivated method	—	¥25,000 ~ *
Laser-assisted hatching	¥3,000	¥18,000
Hyaluronic acid culture solution	¥3,000	¥15,000
SEET method	—	¥20,000 ~ *
Endometrium scratch	—	¥10,000*

## Implantation failure/ Recurrent pregnancy loss

· Preimplantation diagnosis PGT is not covered by insurance.

Normal PGT	¥77,000/1 embryo
High precision PGT	¥99,000/1 embryo

· Prograf, heparin before confirmation of the fetal sac is not covered by insurance.
